esquerrac.github.io 

A software developer with a background centered on multidisciplinary collaboration in the military healthcare industry. Through prioritizing the client experience, I aim to grow myself and those around me with focus squarely on the outcomes for both internal and external customers to develop the highest quality product possible on any given project.

Technical Skills

HTML 5

CSS 3

Bootstrap 4

Javascript ES6

Jquery 3

Public Speaking

Team Leadership

Personnel Management

Employee Development

Instruction/Training

Development Projects

Math Practice

Interactive game designed for preschoolers and Kindergarten aged children to practice their addition and subtraction skills. Problems only require basic counting skills to challenge children without discouraging them. Final Product will be available in multiple languages.

Movie Database

Database driven project utilizing API style requests to create a single page application that persists across multiple refreshes. Application will also accept user inputs and updates to front facing data set featuring various media types.

Simon

Javascript based version of the classic memory game featuring animations and randomly generated patterns.

Coffee Inventory

Inventory graphic user interface that allows users to interact with stock via multiple search inputs by updating and displaying relevant items in real time. This continual engagement improves the user experience by removing the necessity of form submissions and waiting on separate windows to load.

Military Experience

Healthcare Manager

USAF, San Antonio, Texas

March 2013 - May 2016

Managed family violence intervention services to over 60k beneficiaries. Supervised and ensured educational currency of 35 staff members at 3 geographic locations in accordance with federal and healthcare accreditation standards.

Health Education Specialist

USAF, Republic of Korea

February 2012 - March 2013

Created and distributed mental health, addiction, and family violence prevention content to over 20 squadrons of military personnel via classes, theater presentations, and radio broadcasts.

Substance Abuse Counselor

USAF, Omaha, Nebraska

June 2010 - February 2012

Counseling services to military members diagnosed with substance abuse disorders and substance related incidents. Coordinated care with community facilities to provide improved treatment outcomes for patients.

Education

July 2018 - Present

FullStack Web Development

Codeup, San Antonio, Texas

Immersive, project driven 18 week career accelerator program with over 600 hours of expert instruction and keyboard time in software development.
